PROFESSIONAL OBJECTIVE

To obtain a remote software development or product management position for a motivating and innovative team with prospects of professional and personal growth.

WORK HISTORY

📅 2019 - Present

📍 Lockheed Martin, King of Prussia

Software Engineer

Work primarily on test-driven backend micro-services development (TDD) in **Java EE**, with **Jackson-B REST** and **NoSQL** databases in large **Angular** web client application. Focus on backend features with minor frontend dev in Typescript. Work flow in **Agile** environment (SCRUM/KanBan) with GitLab, JIRA.

Handled a significant multiple baselines merge of C++ backend, independently, and communicate with high-level stakeholders.

📅 2019 - 2020

📍 CrystalFruit, Philadelphia

Contractor

Perform content management and redesigns for client websites. Utilized **WordPress**, **PHP**, **HTML**, and **FTP** software. Coded in an Agile environment in **HTML**, **CSS**, over GitLab for most recent project.

📅 2018 - 2019

📍 PSU Applied Research Lab ARL,
University Park

Engineering Intern

Coded **Python** to generate clustering algorithm and tasks for machine learning. Dev in **Java** with VR Graph env, QA with **Agile** env (JIRA, Bitbucket, Confluence).

EDUCATION

📅 2015-2019

📍 The Penn State University,
University Park

Bachelor of Computer Science

Lead and committee member of the Institute of Electronics and Electrical Engineers (IEEE), Society of Hispanic Professional Engineers (SHPE), Fashion Society at Penn State (FSPS)
